About LIDDS

LIDDS AB (publ) develops effective pharmaceutical products for cancer and other diseases with the patented NanoZolid® technology. NanoZolid® releases the medication locally and effectively which means significantly fewer side effects compared with systemic treatment. NanoZolid® technology allows for a controlled, sustained and customized release of medication for up to six months. NanoZolid® can integrate both small and large pharmaceutical molecules such as antibodies. The company's most advanced project, the prostate cancer product, Liproca® Depot containing 2-hydroxyflutamide, validates that the technology has a proven clinical effect. The prostate cancer project is currently in phase IIb. Industrial-scale production is produced in collaboration with Recipharm. LIDDS has active development projects where NanoZolid® is combined with antiandrogens, cytotoxic drugs and immuno-active agents. The LIDDS share is listed on Nasdaq, First North. Redeye AB is LIDDS certified adviser. For more information, please visit www.lidds.se.
